

STRATEGIC SOLUTIONS.  
TECHNICAL EXPERTISE.  
GLOBAL IMPACT.

## ASSET MAINTENANCE

At LBS, we understand that long after construction crews complete their work, infrastructure sustainability and return on investment are dependent on appropriate and satisfactory operations and maintenance.

Our headquarters and its senior leaders are ISO9000-certified in quality management and pledge to maintain and continuously improve our organizational systems.

## OUR SERVICES

LBS has supplied maintenance teams, field operations specialists, logistics personnel and engineering services managers to the state and local governments, utilities and private industry. Leveraging the broader WSP design and construction oversight platform, we can offer complete lifecycle management services.

Services provided by LBS include:

### HIGHWAY MAINTENANCE

- Roadway and bridge asset management, including structures, signage, guardrails, drainage, road markings, rights of way, landscaping, and debris/litter removal
- Facility management services, including building, tollbooth, and gantry maintenance and repair
- Incident management and emergency response services

### TOLL ROAD OPERATIONS

- Comprehensive toll road operations and management services to financial investors and public authorities
- Major life cycle project management and oversight
- Traffic management center operations and staff augmentation

### UTILITY OPERATIONS & MAINTENANCE

- Water utility operations and maintenance, including potable water and sewage treatment plant operations, distribution and collection system maintenance
- Customer billing and payment services
- Emergency management and incident response services
