

STRATEGIC SOLUTIONS.  
TECHNICAL EXPERTISE.  
GLOBAL IMPACT.

## POWER SERVICES

LBS provides complete power generation and medium voltage solutions specializing in military bases, industrial facilities and remote communities around the world.

LBS provides customized power solutions up to 100 megawatts, supporting the full lifecycle of power projects. We focus on emerging and frontier markets, small islands and remote locations to deliver a total power solution spanning planning, design, engineering, procurement, construction, and operations and maintenance.

### BERGER/CUMMINS

Since 2003, the Berger/Cummins Joint Venture has delivered over 400 MW of power generation projects across the globe. This partnership combines WSP/LBS, a 58,000-person worldwide engineering and services company with Cummins Power Generation, a global leader in the design and manufacture of power generation equipment, to deliver expertise for power that's reliable, safe, and efficient.

### LOUIS BERGER POWER KSA

LBPKSA, our joint venture with EXAP Contracting - a KFB Holding Group company, provides reliable and optimal power solutions and services in remote and off grid locations. We form a synergistic team offering new ideas and technologies for greater efficiency, productivity, and outreach in austere environments and in-line with Saudi Vision 2030.

## EXPERIENCE AREAS

Power services provided by LBS include:

### PRIME POWER OPERATIONS & MAINTENANCE

- Comprehensive operations and maintenance of Customer-owned power assets to include medium voltage transmission systems

### CONTINGENCY POWER LOGISTICS

- Supply, installation, and service of power generation and associated power equipment to meet temporary power requirements in emergency response and recovery or other contingency environments

### POWER PLANT EPC

- Engineering, procurement and construction of small scale thermal and renewable power plants, distribution systems and other energy infrastructure in remote locations

### RENEWABLE ENERGY SOLUTIONS

- LBS provides a wide range of services to plan, engineer and deliver green power infrastructure to meet the world's growing need for cleaner, more cost-effective and reliable electricity and energy
